A GUIDING LIGHT FOR A SUSTAINABLE FUTURE

The growing housing demand and increasing population will lead to an increase in India's carbon emissions. Strategic adoption of LED lights will be an enabler for better sustainability and a step in the right direction.

ABOUT US

Our company has been a high level manufacturer since its inception in 1991. Committed to quality and innovation, we have built a strong product portfolio of Wires and Cables.

Our product lines have proven to be a huge success, and we have cultivated an extensive network of over more than 400 dealers, with products ranging from house wiring to industrial power cables. We had entered in LED Lighting business since 2011 and got the same response as in wires and cables.

Now a days everybody who is renovating or constructing his new home are changing themselves from traditional lights to LED lightings as LED lights are much more beautiful, long lasting taking small place easy to repair and more over save at least 50 to 60 % expenses on electricity.

Recognizing the revolutionary potential of LED lighting, in 2011 we expanded our product lines into LED-lighting technologies and applications. Since then, we have undertaken extensive research and development into this technology, and continue to strive to pioneer developments in this market.

HYGRID[®]
LED lighting
INDOOR LIGHTS

PANEL LIGHTS

SIMPLY CREATIVE

Chrome panels with easy installation give you a feel of natural sunlight.

Our LED Panel employs cutting-edge technology to create brilliant, constant light while consuming up to 80% less energy than regular fluorescent bulbs. Our LED Panel is a long-lasting and environmentally friendly lighting option that will eventually help you save money on your energy bill thanks to its expected lifespan of up to 25,000 hours.

STREET LIGHT

A long, straight road at night, illuminated by a series of streetlights. The lights are arranged in a perspective, receding into the distance. The road has a dashed white line down the center and a solid white line on the left. A red light trail is visible on the left side of the road. The sky is dark blue, and the overall scene is a nighttime street view.

HYGRID[®]

SUITABLE FOR VERSATILE APPLICATIONS

LED HIGH BAY LIGHTS are the most preferred choice as they last long and consumes less electricity as compared to standard incandescent light sources, CFLs or Halogen lights. So, they illuminate larger areas without being too expensive.
